# ABSTRACT

2016-2017 Workforce Optimization Product and Market Report

DMG
CONSULTING LLC

DMG Consulting's 13th annual **Workforce Optimization Product and Market Report** provides the most accurate, detailed and comprehensive coverage of this transforming technology sector. The 472-page Report presents all of the vendor, product, functional, technical, pricing and operational data that contact center, IT and enterprise leaders need to find the right solution and vendor to meet their organization's current and future WFO requirements for both the front and back office. The core modules of workforce optimization (WFO) solutions are recording and quality assurance (QA)/quality management (QM). To be considered a true WFO suite, a solution should also include at least 3 of the following complementary applications: workforce management (WFM), contact center performance management (CCPM), speech analytics (SA), text analytics (TA), desktop analytics (DA), enterprise feedback management (EFM)/surveying, eLearning, coaching, gamification and customer journey analytics (CJA).

Please contact Deborah Navarra at deborah.navarra@dmgconsult.com or 516-628-1098 with any questions. To order your copy of the report, visit www.dmgconsult.com.

The WFO market is at an inflection point. Instead of focusing on agent optimization, there is a growing emphasis on employee empowerment and engagement. Analytics is identifying customer insights and companies are starting to use this information to match customers with the right agents to address their needs. Companies are looking to WFO vendors to provide the technology and best practices they need to build effective operating departments where agents have the data they need to deliver a personalized and outstanding customer experience.

2016 was a highly disruptive year for the WFO market, due to the busiest round of merger and acquisition (M&A) activity in its history. But that is just the beginning of what promises to be a major overhaul of the WFO market. WFO functionality is a necessity for companies that need to comply with many regulatory requirements, and are vital for enterprises to provide an outstanding customer journey. However, end users are demonstrating a growing preference for purchasing WFO functionality directly from their automatic call distributor (ACD) vendor.

The rapid growth of cloud-based contact center infrastructure solutions is another factor greatly influencing the future of the WFO market. End users expect their contact center infrastructure vendor to provide all of their functionality, including WFO capabilities. The need to be cloud-ready is driving a surge of innovation in the WFO market, including new architectures, enhanced user interfaces, faster processing and new functionality.

Back-office and branch WFO is finally starting to gain traction. WFO vendors are making investments to capture this growing opportunity, as it is expected to be an increasingly important market opportunity for them. There are substantial differences in the vendors' back-office and branch WFO capabilities, as highlighted in this Report.

The *2016 – 2017 edition of the Workforce Optimization Product and Market Report* covers 9 leading and contending vendors at a detailed level. These vendors are: Aspect, Calabrio, dvsAnalytics, inContact, NICE, OnviSource, TelStrat, Verint, and ZOOM International. Each year the list of vendors changes based on participation criteria, customer requests and changing market dynamics.

Key Elements of This Report

⇒ QM/liability recording market segments and vendor-supported activities

⇒ Functional and technical building blocks and defining characteristics of contact center WFO suites

⇒ Service deployment options for WFO solutions: on-premise, cloud, managed service and hybrid, including the pros and cons of each model

⇒ Market and business trends and challenges that are driving enterprise investments and influencing vendor innovation

⇒ WFO market innovation, including a review of recently introduced functionality and what is planned for the next 12 – 18 months

⇒ Examination of the increasing importance of analytics in WFO suites and WFO vendor analytics offerings

⇒ Discussion of analytics-enabled quality assurance (AQA) and how it can improve agent performance and customer satisfaction and enhance contact center performance

⇒ An insightful look at how WFO suites and best practices can be leveraged to engage and empower today's Millennial workforce

⇒ Discussion of the importance of omni-channel customer engagement and the applications and strategies to support a seamless cross-channel customer experience

⇒ Explanation of how WFO suites support the top contact center servicing trends and initiatives

⇒ Detailed revenue and market share analyses featuring first-half 2016 vs. first-half 2015 revenue comparisons, by vendor, based on GAAP revenue for total company, the contact center WFO segment, the quality management/recording (WFO) sector, voice recording, contact center and non-contact-center voice recording, and QA/QM

⇒ 5-year WFO market projections for 2016 – 2020

⇒ Review and assessment of the rapidly changing WFO competitive landscape, market consolidation and acquisition activity over the past 12 months, and vendor competitive positioning

⇒ Overview of the 9 leading and contending WFO vendors, including company snapshots, go-to-market strategy, WFO suite overviews and packaged offerings

⇒ Comparative analyses of the key functional capabilities of the 9 featured WFO suites

⇒ Comprehensive customer satisfaction survey results that measure and rank ratings across 15 product components, 16 effectiveness categories and 11 vendor categories

⇒ Detailed pricing analysis for a 250-seat on-premise, cloud-based and managed service QM/recording/coaching implementation, including incremental costs for WFM, CCPM, EFM, speech, text and desktop analytics, and gamification

⇒ Detailed company reports for the 9 leading and contending WFO vendors, analyzing their products, functionality and future product development plans

⇒ Comprehensive WFO Vendor Directory

Report Highlights

- **_The contact center WFO market has reached a critical juncture:_** Vendors are shifting the focus of WFO solutions away from employee productivity and moving toward solutions that promote employee and customer engagement. Analytics – speech, text, desktop and, increasingly, customer journey – represent the future of WFO. Organizations need insights into all of the actions that their employees take when interacting with customers, and analytics solutions provide the data required to take appropriate actions to correct any impediments to service excellence and deliver a consistently outstanding customer experience.

- **_WFO functionality is still in great demand:_** WFO has always been an essential productivity tool for contact centers, and the new generation of solutions is designed to integrate into end users' existing environments, enabling them to improve the customer experience, reduce operating costs and better engage employees and customers. Companies are hungry for the new WFO technology, capabilities, concepts and practices. The next generation of offerings is also being designed to address the needs of the huge, addressable back-office and branch market.

- **_Mergers and acquisitions are changing the competitive landscape in the WFO market:_** 2016 saw a large number of acquisitions, and more WFO companies are on the block. The market is saturated with vendors, and given the maturity of the sector and the availability of so many offerings, end users are unwilling to pay high prices for these somewhat commoditized solutions.

- **_The cloud is exerting a profound influence on the future of the WFO market:_** Cloud-based contact center infrastructure solutions have taken off, and WFO capabilities are in strong demand as part of these platforms. As WFO capabilities become more widely available in the cloud, they are now more affordable for companies of all sizes and in all verticals. The cloud is also driving a long overdue transformation of architecture, product and system usability.

WFO Functional and Technical Framework

Presence Engine

- Recording
- Quality Assurance
- Workforce Management
- Coaching
- eLearning
- Performance Management
- Enterprise Feedback Mgmt
- Speech Analytics
- Text Analytics
- Desktop Analytics
